

Website Plan — Custom Web Design, SEO & Automation Agency

Core Strategy

Your biggest competitive edge is the one thing every competitor skips: **you listen first, then design**. No templates, no guessing, no generic layouts pulled from a library. Your website must *prove* this before a visitor reads a single word — through its own design, feel, and personality.

Every page has one job: move the visitor one step closer to booking a discovery call.

Brand Positioning Statement

Use this everywhere — headline, pitch, bio, social:

"We don't start with a template. We start with a conversation. Every website we build is designed around your business, your customers, and your goals — then built to look unlike anyone else in your industry."

Design Direction for Your Own Website

Your site is your portfolio piece #1. It needs to signal:

- **Craft** — attention to spacing, typography, and motion
- **Personality** — not corporate, not generic, warm and confident
- **Uniqueness** — the layout itself should feel custom

Recommendations:

- Use a bold, expressive hero with large custom typography — not a stock hero image
 - Subtle scroll animations (fade-ins, parallax on text layers) show technical skill passively
 - Dark and light section alternation to create visual rhythm
 - A custom color palette that isn't the usual blue-and-white or black-and-white
 - Micro-interactions on buttons and hover states
 - No stock photography of laptops and handshakes — use your actual work, abstract shapes, or illustrated elements
-

Page-by-Page Plan

Page 1: Homepage

Goal: Immediately communicate who you are, what makes you different, and guide the visitor to one of three next steps — see your work, see pricing, or book a call.

Section 1 — Hero

- **Headline (big, bold):** "Your website should look as good as your business runs."
- **Sub-headline:** "We design every website from scratch — no templates, no shortcuts. Just a custom site built around you."
- **CTA buttons:** [Start my project] [See our work]
- **Visual:** Either a looping animation showing a "before (template) vs after (custom)" transformation, or a split-screen showing 2-3 samples of work side by side
- **Trust signal below fold line:** 5-star rating bar + "Trusted by [X] local businesses"

Section 2 — The Problem (Agitation)

Short punchy section, 2-3 sentences:

"Most small business websites are built from the same 12 templates. Your customers can tell. We can't."

This creates instant contrast and curiosity.

Section 3 — How You're Different

Three columns, icon + short copy each:

Icon	Heading	Copy
Ear	We listen first	Before we design anything, we learn your business, your customers, and your goals.
Brush	Everything is custom	Zero templates. Every layout, color, and section is made for you.
Chart	Built to convert	Beautiful isn't enough. Every site is built to turn visitors into calls and leads.

Section 4 — Services Overview (3 cards)

Simple, clean cards:

- **Websites** — Custom-designed, mobile-ready, built to last

- **SEO** — Help your business show up when customers search
- **Automation** — Capture leads, follow up automatically, book appointments

Each card links to the full Services page.

Section 5 — Featured Work (2–3 examples)

Large visual cards with:

- Industry label (e.g. "Cleaning Company")
- Before/after slider or full screenshot
- One result stat if you have it (e.g. "Lead form submissions up 3×")
- [View project] link

Section 6 — Packages Preview

Show the 3-column pricing preview (Starter / Business / Growth) with a note: *"Most clients choose the Business or Growth plan."*

- [See all pricing] link below

Section 7 — Social Proof

- 3–4 client quotes (real ones, with name and business)
- Or a grid of Google review stars with a total count

Section 8 — Final CTA

- **Headline:** "Ready to stop blending in?"
- **Sub:** "Tell us about your business and we'll design something that's actually yours."
- [Book a free discovery call] button

Page 2: Our Work (Portfolio)

Goal: Show range, quality, and real results. This is your proof page.

Layout Options

- **Grid view:** 6–9 projects shown as cards with industry tag, hover effect, and click-through
- **Case study format:** 2–3 featured projects with full story (challenge → process → result)

Each Project Should Show

- Industry/business type
- What was built (website, SEO, automation)
- 1–2 screenshots or a before/after
- One result metric if available
- Brief paragraph on what made the design decisions unique

Before/After Slider

If you have redesign work, a slider showing the old vs new is extremely powerful. Visitors spend 3× longer on pages with these.

Bottom CTA

"Want a website this good? Let's talk." → [Start my project]

Page 3: Services

Goal: Explain the three service areas clearly and filter visitors toward the right package.

Structure

Three service sections, each with its own heading, description, and what's included:

Custom Website Design

- Lead with the differentiator: *"We don't pick a template. We learn your business and design from a blank canvas."*
- Bullet list of what the process includes
- Examples of site types (service businesses, contractors, restaurants, etc.)
- Link to pricing

Local SEO

- Explain the value simply: *"If your customers can't find you on Google, your website isn't working."*
- Three tiers: SEO Lite (\$149/mo), SEO Growth (\$299/mo), SEO Pro (\$499/mo)
- Disclaimer: *"SEO results are not guaranteed, but we follow best practices to improve your visibility over time."*
- Link to pricing

Automation & CRM

- Use the human angle: *"Most businesses lose leads because no one followed up. We automate that entire process."*
- Bullet features: CRM, chatbot, missed-call text-back, booking calendar, automated email/text, review requests
- Link to pricing

Bottom of Services Page

Short FAQ:

- "Do I need SEO if I just got a website?" → Yes, but you can start with just the site and add SEO later.
 - "Can I add automation later if I don't need it now?" → Absolutely.
 - "What if I already have a website?" → We can redesign it or optimize what you have.
-

Page 4: Pricing

Goal: Present your packages clearly, handle objections before they come up, and push toward the most profitable plans.

Layout

Show all five tiers in a comparison-style layout. Highlight the Growth plan as "Most popular."

Plan	Price	Best for
Starter	\$99/mo	Simple presence
Business	\$149/mo	Local service businesses
Growth ★	\$249/mo	Lead-focused websites
Growth + Automation	\$399/mo	Businesses that miss calls
Premium Custom	\$499+/mo	High-end brands

Below Each Plan

- Feature list (condensed from your PDF)
- [Get started] button

Objection Handling (add a short block below the table)

┃ *"Free setup with a 12-month agreement. You own your domain. We handle the rest."*

Add-On Services Section

List add-ons in a clean table:

- Extra page, blog posts, logo design, Google Business Profile setup, SEO packages, etc.
- Label clearly as optional

FAQ Strip

- "Is there a contract?" → 12-month agreement for free setup. Month-to-month also available with a setup fee.
 - "What if I want to cancel?" → Explain your policy clearly.
 - "Are SEO results guaranteed?" → No — but we follow best practices.
-

Page 5: Our Process

Goal: Remove fear. Show that working with you is easy, personal, and results in something they'll love.

This page is your secret weapon against the question: *"Will they understand what I want?"*

The 5-Step Process (visual timeline or vertical steps)

Step 1 — Discovery call (free) *"We start by listening. Tell us about your business, your customers, your goals, and your taste. No templates, no assumptions."*

Step 2 — Style & direction *"We share mood boards and design directions based on what we learned. You pick the feel — we do the design work."*

Step 3 — First draft *"We build the first version of your site and walk you through it together. You'll see exactly what your customers will see."*

Step 4 — Revisions *"We refine until it's right. You approve it when you love it."*

Step 5 — Launch & support *"We launch, monitor, and maintain your website every month. You're never on your own."*

Supporting Copy

┃ *"Most of our clients say the same thing after their site goes live: 'It actually looks like us.' That's the goal every time."*

Bottom CTA

[Book your free discovery call] →

Page 6: Contact / Start My Project

Goal: Make starting feel easy. Low commitment, high clarity.

Section 1 — Warm intro

"You don't need to know exactly what you want. Just tell us a bit about your business and where you're at — we'll guide the rest."

Discovery Form (keep it short — max 5 fields)

1. Your name
2. Business name and type
3. Do you currently have a website? (Yes / No / Yes but it needs work)
4. What are you looking for? (Checkboxes: Website / SEO / Automation / Not sure)
5. Best way to reach you (email or phone)

Optional last field: "Anything else we should know?"

Submit button: **"Let's talk"** — not "Submit"

Section 2 — Book a call

Embed a simple calendar booking tool (Calendly, Cal.com, or your own booking from the automation package).

"Prefer to talk first? Book a free 20-minute discovery call. No pitch, no pressure — just a conversation."

Section 3 — Reassurance

- Response time: *"We reply within 1 business day."*
- No spam promise
- Short list: "What happens next?" → We review your info → We schedule a call → We send you a proposal

Conversion Strategy: Turning Visitors into Clients

The 3 Types of Visitors (and how to serve each)

1. The "just browsing" visitor They don't know if they need you yet. → Hook them with the

problem statement in the hero and the "how we're different" section. → Get them to the Work page to see proof.

2. The "I need a website" visitor They know what they want, they're comparing options. → Get them to Pricing fast. Make the Growth plan the obvious choice. → Show the free setup offer prominently.

3. The "I need leads, not just a website" visitor More sophisticated. They care about results. → Lead them to the Growth + Automation plan. → The "Our Process" page builds their trust.

CTAs — Keep It One

Every page should have one primary CTA: **"Start my project"** or **"Book a free call"**. Don't split attention with multiple competing buttons. Secondary links are fine, but the main button is always the same.

Sticky Navigation

Keep a [Start my project] button in the top navigation at all times. Visitors should never have to scroll back to find the entry point.

Exit Intent / Scroll Trigger

After a visitor scrolls 70% of any page, show a subtle banner or floating button: *"Ready to get started? Book a free 20-minute call."*

SEO: Your Own Site

Since you offer SEO, your own site should model best practices.

- Title tags with local intent: "Custom Website Design for Small Businesses | [City]"
 - H1 on homepage includes your service + location
 - Meta descriptions on every page
 - Google Business Profile linked and optimized
 - Schema markup for local business
 - Page speed optimized (your site should score 90+ on PageSpeed)
 - Blog (optional but powerful): *"Why template websites hurt local businesses"*, *"What is website automation and do you need it?"*, etc.
-

What to Build First

If you're launching soon, prioritize in this order:

1. **Homepage** — your first impression
2. **Pricing page** — your conversion engine
3. **Our Work / Portfolio** — your proof
4. **Contact page** — your lead capture
5. **Services + Process** — supporting depth

You can add the blog and expanded case studies after launch.

Final Note on Your Own Design

Your website is the most powerful sales tool you have. It should:

- Load fast
- Look unlike any template
- Feel warm, confident, and personal
- Show real work
- Make starting feel easy

When someone lands on your site and thinks *"if they can make their own site look this good, imagine what they'd do for mine"* — that's the goal.
